1. Overview

1.1 Introduction

AvaTax for Communications (AFC) uses a system of numbers to represent the Transaction Types and Service Types for the service you wish to tax. Passing valid combinations of transaction service type pairs provides AFC part of the information necessary to produce the appropriate taxes for a specific jurisdiction.

1.2 Valid Pairings

In order to receive accurate taxes it is necessary to select a valid transaction service type pair that matches the service you are providing. As an aid to selecting the proper transaction service type pairs, the table lists the valid pairs and provides a primary usage description for each one. AFC will not return accurate taxation if improper transaction service type pairs are selected.

1.3 Tax Types

AFC will calculate taxes for the jurisdiction for the transaction service type pair entered. You can find a description of all the current tax types returned by AFC in the following pages.

2. Transaction and Service Types in Valid Pairing

The T/S pairs that are available in both the Telecom and SAU interfaces are for use within the United States only.

Trans Type	Svc Type	Name	Description	Interface
0	0	No Tax/No Tax	Usage of this mapping combination will ensure that no federal, state or local taxes are returned.	Telecom
1	1	Interstate/Toll	Interstate toll calls, MRC (monthly recurring charges), and other related service-type charges and features. (Call originates and terminates in different states.)	Telecom
1	2	Interstate/Toll-Free	Interstate and international toll-free calls, MRCs, and other related service type charges and features. (Same as Interstate Toll call above, however the owner of the toll-free number pays all the applicable long distance charges.)	Telecom
1	3	Interstate/WATS	Interstate and international WATS service charge, MRC, and other related service type charges and features. (Same as Interstate Toll call above, but often sold as a set-pricing scheme for a designated long distance calling area.)	Telecom
1	4	Interstate/Private Line	Interstate or international private line service charge, MRC, and other related service type charges and features. (Charges are for a service in which the service originates at the customer's premises and connects only to a designated termination location. No switching or access to other third party lines. The private line will cross over a state or country border.)	Telecom
1	12	Interstate/International Toll	International calls that originate in the US, terminate outside the US, and are billed to a US address.	Telecom
1	14	Interstate/Late Charge	Late charge imposed on customers of interstate or international LD services.	Telecom
1	16	Interstate/900	Interstate or international 900 service charge, MRC, and other related service type charges and features. (Same as Interstate Toll call above, but the caller of the 900 number pays for the applicable long distance charges.)	Telecom
1	27	Interstate/Data	Interstate or international data service charge, MRC, and other related service type charges and features. (This combination is appropriate for transmissions that carry data exclusively. Use Private Line if any component is voice. This is a recommended mapping for data transmissions carried over DSL, ATM, T-1, frame relay lines and other non-voice services. This is not for Internet Access provided over DSL lines.)	Telecom
1	54	Interstate/Directory Assistance	Charges for Directory Assistance calls that cross state boundaries.	Telecom
1	562	Interstate/Local Loop	Local loop charge that is not part of a local exchange service and is sold in conjunction with an interstate private line.	Telecom
1	635	Interstate/Toll Free Number	Monthly recurring charge for access to a toll free number. This represents the interstate portion.	Telecom

Trans Type	Svc Type	Name	Description	Interface
2	1	Intrastate/Toll	Intrastate toll call, MRCs, and other related service types charges and features. (Call originates and terminates within the same state.)	Telecom
2	2	Intrastate/Toll-Free	Intrastate toll-free calls, MRC, and other related service type charges and features. (Same as Intrastate Toll call above, however the owner of the toll-free number pays all the applicable long distance charges.)	Telecom
2	3	Intrastate/WATS	Intrastate WATS service charge, MRC, and other related service type charges and features. (Same as Intrastate Toll call above, but often sold as a set-pricing scheme for a designated long distance calling area.)	Telecom
2	4	Intrastate/Private Line	Intrastate private line service charge, MRC, and other related service type charges and features. (Charges are for a service in which the service originates at the customer's premises and connects only to a designated termination location. No switching or access to other third party lines. The private line will be entirely within a state and not cross a state border.)	Telecom
2	5	Intrastate/Local Exchange	The basic flat rate for intrastate local exchange service. This transaction/service types will include any applicable long distance access line charges, or other local service-related fees and charges. (Does not include local feature charges.)	Telecom
2	14	Intrastate/Late Charge	Late charge imposed on customers of intrastate LD services.	Telecom
2	16	Intrastate/900	Intrastate 900 service charge, MRC, and other related service type charges and features. (Same as Intrastate Toll call above, but the caller of the 900 number pays for the applicable long distance charges.)	Telecom
2	27	Intrastate/Data	Intrastate data service charge, MRC, and other related service type charges and features. (This combination is appropriate for transmissions that carry data exclusively. Use Private Line if any component is voice. This is a recommended mapping for data transmissions carried over DSL, ATM, T-1, frame relay lines and other non-voice services. This is not for Internet Access provided over DSL lines.)	Telecom
2	54	Intrastate/Directory Assistance	Charges for Directory Assistance calls that are contained wholly in one state.	Telecom
2	630	Intrastate/Private Line (10% Rule)	Intrastate private line service charge, MRC, and other related service type charges and features. (Charges are for a service in which the service originates at the customer's premises and connects only to a designated termination location. The private line will be entirely within a state and not cross a state border.) Traffic on this type of line is considered mixed use and interstate traffic exceeds 10 percent; thus the revenues are treated as interstate for Universal Service contribution purposes.	Telecom
2	631	Intrastate/Data (10% Rule)	Intrastate data service charge, MRC, and other related service type charges and features. (This combination is appropriate for transmissions that carry data exclusively. Use Private Line if any component is voice. This is a recommended mapping for data transmissions carried over DSL, ATM, T-1, frame relay lines and other non-voice services. This is not for Internet Access provided over DSL lines.) Traffic on this type of line is considered mixed use and interstate traffic exceeds 10 percent; thus the revenues are treated as interstate for Universal Service contribution purposes.	Telecom

			Line Fee (not the actual fees for Centrex services or the line counts on Centrex systems).	
7	642	Local/FCC Subscriber Line Charge Centrex Bundle	Charge for recovering the cost of connecting the Centrex customer premise to the local phone network, often referred to as the Federal Subscriber Line Charge (SLC) or the End User Common Line (EUCL) Charge. The FCC has established per-line caps for primary and secondary line charges. This charge is not a tax or a governmental assessment, but an authorized charge for the recovery of cost for providing local exchange service. This transaction is intended only for taxation of the Subscriber Line Fee (not the actual fees for Centrex services or the line counts on Centrex systems). This service type should be used when passing bundled local service as defined in IRS Notice 2006-50, as it will not return Federal Excise Tax (FET).	Telecom

4. Tax Types and Descriptions

1	Sales Tax
	This is a tax on the privilege of purchasing goods and services.
2	Business and Occupation Tax
	This is a tax that is normally based upon having a business, occupation, or residence within the taxing authority's geopolitical boundaries.
3	Carrier Gross Receipts
	This is a tax based upon gross receipts of the telecommunications carrier. Each portion of the tax is passed on to consumers based upon the amount of their phone bill.
4	District Tax
	District taxes are taxes associated with a particular district. Typically this is a school district, however, it could be a redevelopment, sports, entertainment or some other type of district.
5	Excise Tax
	Excise taxes are imposed at the manufacturer and/or retail level and are virtually indistinguishable from a sales tax to the consumer. However, many excise taxes are considered part of the sale or gross receipts and are therefore taxes by sales and/or gross receipts taxes.
6	Federal Excise Tax
	Federal tax on telecommunications services.

7	Fed USF A - School
	A federal universal service fund imposed by the Federal Communications Commission to fund schools, libraries and rural health care support mechanisms. (See also type 18)
8	License Tax
	Tax based upon the granting of a license to perform a service to the community. In many cases, this tax can be passed on to consumers.
